

THE INTERNATIONAL FORUM FOR SCIENTIFIC YOUTH
«STEP INTO THE FUTURE»
YOUTH OF THE WORLD – TO SCIENTIFIC AND TECHNOLOGICAL
CHALLENGES OF OUR TIME

DEDICATED TO THE 300TH ANNIVERSARY OF THE RUSSIAN ACADEMY OF SCIENCES

Information Letter / 18.10.2023

Future science and technology leaders, the best young researchers and developers of our planet will present their creative projects at the grandiose world championship – the International Forum for Scientific Youth «Step into the Future».

In the spring of 2024, the Forum will bring together in Moscow 1,500 ambitious and talented young people from Europe, Asia, America, Africa, Oceania. Themes of the Forum cover the most hot topics in engineering, exact, natural and social sciences and humanities. The express-presentation of the Forum is available at: <http://www.step-into-the-future.ru/eng>.

The Forum invites pioneers of the future – schoolchildren and entry-level students at the age of 12-22, who have their own findings in science and engineering. The Forum mission is making achievements of participants known to a wide world audience. It is customary that central Russian TV channels, foreign and Russian media cover events at the Forum.

The Forum is organized in a unique format. Its events will be held in first-class academic environment – on the basis of 14 world-level research centers and 13 elite Russian universities. The Chairman of the Program Committee at the Forum is Academician S.N. Kalmykov – the Vice-President of the Russian Academy of Sciences.

Lead organizers of the Forum are the Bauman Moscow State Technical University and the Russian Youth Engineering Society.

Individual and team projects (up to three authors) can be presented at the Forum. The basic form of achievements appraisal at the Forum is defense of research and development results in the presence of scientists and specialists with participation of peers and invited professionals. Working languages at the Forum are Russian and English.

The participants will have an eventful program – a Science & Technology Exhibition of the best researches and developments, more than fifty thematic sessions, scientific and educational platforms, a festival of young couturiers and fashion designers, Olympiads and competitions, familiarization with research laboratories and engineering centers, as well as the key contest of the Forum – the battle of teams for the Science & Technology Cup of Russia.

The Forum will be organized as two-staged – face-to-face and distant. The live stage of the Forum will be held from March 25 to March 29; the distant stage will be held during April. The main form of the Contest at the face-to-face stage is presentation and defense of projects at the International Science & Technology Exhibition, at the distant stage – at international scientific sessions.

Each stage of the Forum has its own system of awards, including more than one hundred nominations for more than five hundred winners and prizers. The collection of high-status awards contains diplomas of the Russian Academy of Sciences, universities, research centers and high-tech companies as well as scientific medals and cups, scholarships and internships.

The Forum is the key event of the «Step into the Future» program – the leading Russian organizer of works with talented youth in the field of researches and developments. Every year, more than 150 thousand talented schoolchildren and students take part in the program. The scientific and technological ecosystem of the program - which is the place for research and development works of trainees – covers 678 partner organizations, including universities, research institutes, high-tech companies, environmental organizations, culture and health institutions.

The «Step into the Future» program accumulates more than 25-year experience in international activities. In 2005, it was the organizer of the XVII European Union Contest for Young Scientists, which was held in Moscow with participation of official delegations from 35 countries.

Participants in the competitive selection and presentation of their projects should pass through registration from October, 18 to January, 9 (for face-to-face participation) February, 1 (for distant participation) on the Forum website: www.step-into-the-future.ru/eng. The projects should be drawn up in accordance with rules posted at www.step-into-the-future.ru/eng. The registration fee in the amount of 800\$ is obligatory for participants at the face-to-face stage and covers costs of accommodation, participation in the scientific-educational program, local transportation and organization.

If you have any questions about participation, please contact the Secretariat of the «Step into the Future» program by phone: +7 (499) 267-55-52, +7 (499) 263-73-60. Information about the Forum is posted on the main website of the «Step into the Future» program www.step-into-the-future.ru.
